Yangtze Cooling Ice Systems Co., Ltd

About Us

Yangtze cooling is a professional on the high quality polyurethane panels to construct coolrooms & freezers are light weight, high strength, good heat insulation, anti-corrosive, age-resistant, moth proof, non-poisonous and non-mould, preserving heat, easy assembling and disassembling.

Our product applications covers in wide ranges including: energy efficient cool rooms, freezers, mobile cool rooms, food processing plants, farm coolrooms, portable buildings, warehouse & factories, clean rooms, laboratories and hospitality applications.

Our core Service:
Production & Sales;
Design & installation;
Repair & maintenance.

FOOD SAFETY

Food safety impacts our reputation and public health. Ensure food safety during entire refrigeration is our important job. The cold storage & refrigeration equipment units can be able to keeping all kinds of food and drinks which require changeable temperature.

ENVIRONMENT PROTECTION

We use environmental friendly R404A refrigerant. BITZER, COPELAND, SCHNEIDE Compressor series and refrigeration accessories units adopt strict German, American, French production procedures which reduces noise when operating.

Fresh Vegetable/Beverage/Fish/Meat/Cold Storage

- Polyurethane insulated panels, density 40-42/kg/m³ with fire retardant which are moulded with male / female joints and held by eccentric action cam-locks
- The visible exterior surfaces of the panels are coated, stainless steel with durable scratch resistant polyester, which is classified as food safe.

- Standard thickness
- Clean workshop/operation room: 50mm
- Vegetable/Beverage/storage of fresh meat or fish : 100mm
- Frozen storage select : 150mm
- Blast freezer select: 200mm

- Doors select swing door/sliding door/double open door

- Door are already pre-mounted on a panel for ease of assembly in the field.
- The door is supplied with hinges and a lockable door handle with a safe release, which overrides the lock at all times.
- Door threshold and surround is fitted with a heater to prevent freezing of the gasket to the frame in low temperature models.
